

BUG REPORT AND FIXES :

1. Route only accepted POST instead of GET and POST.
2. Form used `request.args` instead of `request.form`.
3. Notes were added even when empty.
4. Template was not rendered on GET request.
5. Form action was empty, causing incorrect URL behavior.
6. Global list notes resets on server restart (optional improvement).
All issues fixed in refactored code.
